

## Multibagz Quick Guide.

To make a handbag, take two sheets of beautiful card and lubricate the back with tumble dryer sheets.

Place the card onto the board and locate the channel of the bag you wish to make, place the ball tool into the channel and press into the card when you have completed the desired shaped bag, repeat again onto the second sheet of card.

Cut out both of the designs and embellish with pretty peel offs and flowers etc, if you want a decoupage design bag emboss a third shape and cut out relevant bits i.e. the handle etc.

On the back of the board there are many buckles and corner shapes also to decorate the bag, emboss these in a contrasting card and apply with foam pads.

Make your story using story book creator and print them off if you wish to keep them together apply a brad to the corner.

Go back to the instruction sheet (supplied with the board) now to see how to make a pocket to hold the book.

Using the flap on the board at the top, emboss this piece and then fold it over this joins the front bag panel and back bag panel together, for your convenience we have added side and bottom panels to give complete flexibility to this lovely range of handbags.

For smaller handbags you do not need the flap, just stick the handles together.
